The Story of Shinexy

By Austin Swinehamer, 5th grade, Mrs. Shaner (ELA)

In the grass of the buckwalter bolts baseball field lies a
fuzzy little pokemon species that had no name so Jason
decided to try to catch one. This Jason kid, yeah he's not
the smartest he is not good with pokemon so he had one
ball no pokemon and there is nobody who has touched,
examined, caught, or really even seen one of these
before but because Jason has more pokeballs than
brains so he tried to catch it. Like I said earlier nobody
has really seen the pokemon before so there was no
shiny chase variant so he didn't look so he just threw the
ball. The pokemon was in the ball. It bounced three
times so he caught it. He was so excited but there were
no sparkles. In the knowledge that Jason has if a
pokemon has sparkles it is shiny. This pokemon was not,
so he named it Shinexy and from now on that's what
everyone calls it and his was not shiny but everyone
else's was, so he'll go down in history.

The bears are waiting for the fish. The fish are scared and the bears are hungry. Some fish as sneaky and manage to escape the bears. But some are not lucky and get eaten. The others go mate and die. It is a sad story either way. But at least the bears got a snack. I guess you have to wait until next summer bears.
